Installation of a pedestrian walkway on McGill College Avenue

Date : November 1–4, 2019, 10:00 p.m. to 5:00 a.m.*

Where: On the east side of McGill College Avenue, between the Montréal Eaton Centre parking lot and Sainte-Catherine Street West

Nature of upcoming work

In order to continue excavating the REM's future McGill station, it is necessary to widen the work space on the sidewalk on the east side of McGill College Avenue, between the entrance to the Montréal Eaton Centre parking lot and Sainte-Catherine Street.

In order to maintain access to the various buildings located on this side of the avenue during the work, a pedestrian walkway will be installed during the weekend of **November 2–4, 2019, from Friday evening at 10 p.m. to Monday morning at 5 a.m.**

- Flaggers and appropriate signage will be put in place to access the shops and 1501 McGill College Avenue.
- Access to 1401 McGill College Avenue will be obstructed for the duration of the work.

This walkway will remain in place until the work on the future Réseau express métropolitain station is completed in 2022.

* Due to the nature of the activities being performed, work cannot be interrupted while it is in progress; it must be completed so as to maintain the integrity of the existing infrastructure. Should this situation arise, the work period will be adjusted to complete the work already begun.
