

The Attention, Behavior and Sleep Lab of McGill University is seeking an outstanding candidate for an open postdoctoral position.

The successful candidate will participate in developing a school-based sleep intervention using a community based participatory research approach, and will apply qualitative research methods to analyzing information used to tailor the intervention to the relevant communities.

Methods of interest include: (i) demonstrated experience in qualitative research in psychology, education, nursing or related fields, (ii) experience working with the school or health systems, (iii) ability and interest to coordinate research and (iv) training or knowledge in clinical or educational or school psychology.

The candidate will work in the research lab of Prof. Reut Gruber in strong collaboration with graduate and undergraduate students, educators, psychologists, parents, students, school administrators and research assistants .

Required qualifications: For consideration, applicants should possess the following qualifications or attributes: A Ph.D. degree from a reputable university in a topic of relevance (see above); Experience in conducting and analyzing qualitative research demonstrated in publications; Strong interest in clinical - educational applied research; An ability to work in an interdisciplinary team.

The successful candidates will be expected to structure tasks, to meet project goals and author high-impact publications. The candidate will also be expected to mentor students, fulfill project administration functions, prepare research reports, communicate research progression to the educational partners and contribute the research team exchanges. The candidate is expected to meet programmed project milestones and can respond to deliverable timelines. The list of duties and responsibilities outlined above is representative and not a complete and detailed list of tasks which may be performed by an employee whose position has been matched to this generic job description.

Position is programmed for a 1-year duration, and extendable for a second year upon mutual agreement.

The salary for the position will be 35 000 \$ annually.

How to apply: If you meet the above requirements and are interested in this position, please provide by email a detailed resume, a short personal statement explaining your scientific and research interests, and contact information for three referees in support of your application (as PDF files). If you have published manuscripts as a first author, please include a copy of each manuscript in your application.  
Recruitment will remain open until the position is filled.
